

Lump Sum Interest Payment Lifetime Mortgage Variable Interest Rate

This is not a consumer advertisement. It is intended for professional Advisers only.

At a glance

What is it?

A Lifetime Mortgage which provides your customer with a one-off lump sum and allows them to pay up to 100% of the monthly interest on the loan for the life of the mortgage.

The minimum amount of interest they can pay is £25 and the maximum is the whole of the interest. Your customer selects the amount of the payment at outset, which cannot be varied during the repayment term, unless your customer has opted for the payment to increase as a result of any rate change.

Who is it suitable for?

A variable rate may be suitable for customers who:

- Understand that the product rate is linked to the Consumer Price Index (CPI)
- Are accustomed to index linked products and are prepared to take the risk that other types of interest rates could cost them less in the longer term
- Understand that the CPI rate can go up as well as down.

An Interest Payment loan may be suitable for customers who:

- Have some concerns about the impact of interest roll-up and how this will reduce the equity in their property
- Have family with concerns about the impact of interest roll-up on their inheritance
- Are looking for the discipline of a regular monthly payment to pay some or all of the interest. These customers may have been used to making monthly payments on their mortgage in the past.
- Want to continue borrowing into retirement and can't continue their current interest borrowing with their mainstream lender.
- Are looking for an interest only loan for a house purchase, or to help their child with a deposit for a house purchase where the child would like to help make contributions to the interest being charged on the loan.
